### PROFESSIONAL EXPERIENCE

Joe Dakin has extensive professional experience in international environmental health and safety consultancy. He has significant experience evaluating industrial and manufacturing processes for occupational health and safety and environmental compliance.

He has conducted numerous worker exposure assessments to evaluate exposures to physical, biological and chemical hazards in manufacturing, industrial and commercial settings. He has significant experience developing sampling plans, conducting compliance assessments, and providing recommendations for improving occupational health and safety within the workplace.

His environmental experience also includes ambient air quality monitoring and assessments for industrial clients, government agencies and remediation projects, community and industrial noise assessments and evaluation of air/noise pollution control technologies, auditing of environmental health and safety practices for regulatory compliance.

He has extensive experience overseeing and performing field work/research to collect environmental data in accordance with established scientific principles and providing training on environmental and industrial hygiene sampling techniques. Additionally, he has demonstrated experience with the operation and monitoring of industrial wastewater treatment systems.

He has significant experience performing corporate social responsibility (CSR) and supply chain security (CTPAT) assessment and audits for compliance with brand-specific, local law requirements and industry best practices. He has developed and implemented numerous capacity building programs to educate manufacturing facilities on environmental health and safety and social responsibility concepts and practices.
